## SUMMARY

Data Analyst with hands-on experience building SQL pipelines, cohort models, and BI dashboards that drive business decisions. Identified \$697K in churned MRR, benchmarked 100+ ML algorithms, and mapped competitor intelligence across Amazon and Flipkart. Seeking Data Analyst or Business Analyst roles where ambiguous data problems need structured, insight-driven solutions.

## EXPERIENCE

### CEO Intern – Competitor Intelligence & Market Analytics

Apr 2026 – Present

*Tunez*

*Bengaluru, India*

- Built competitor benchmarking system tracking pricing, listings, and review velocity across 6+ brands (boAt, Noise, Boult, pTron, Mivi) on Amazon, Flipkart, and D2C channels using Python and Excel.
- Developed pricing gap models and conducted sentiment analysis across 1,000+ competitor reviews, surfacing actionable product and pricing strategy insights for leadership.

### Data Analyst – Model Evaluation & Benchmarking

Sep 2025 – Nov 2025

*Alignerr*

*Remote*

- Delivered comparative performance reports across 100+ ML algorithms using structured evaluation framework assessing feasibility, engineering complexity, and business applicability, improving evaluation consistency by 25%.
- Produced decision-support documentation through systematic benchmarking that reduced ambiguity in algorithm selection workflows and enabled data-driven model selection decisions.

### Data Analyst – Quality Auditing & Validation

Oct 2024 – Mar 2025

*Outlier AI*

*Remote*

- Increased data reliability by 30% auditing thousands of AI-generated outputs using root cause analysis and structured validation frameworks to isolate failure patterns and recurring anomalies.
- Designed 100+ adversarial test cases to stress-test model behavior, translating findings into optimization signals that informed cross-functional model readiness decisions.

## PROJECTS

### SaaS Customer Churn & Revenue Risk Analytics | *Python, SQL, PostgreSQL, Google Sheets*

[GitHub](#)

- Identified \$697K in churned MRR and 57% revenue churn rate across 2,800+ subscriptions via SQL KPI dashboards and cohort lifecycle analysis, revealing Premium users drove 68% of revenue loss.
- Discovered 40% higher churn probability in users inactive 30+ days through behavioral segmentation, pinpointing payment failures and support tickets as key churn drivers.

### Data Analyst Job Market Analysis – India | *Python, Web Scraping, Pandas, Tableau*

[GitHub](#)

- Analyzed 1,000+ job postings to identify salary-skill correlations; SQL proficiency linked to 22% higher median salaries (Rs.6.8L vs Rs.5.6L), Python + Tableau found in 45% of high-paying roles.
- Built demand-salary trade-off framework through text parsing and skill normalization, mapping optimal skill combinations for data analyst career progression.

## TECHNICAL SKILLS

**Languages & Querying:** Python, SQL (PostgreSQL, MySQL)

**Analytics & Methods:** EDA, A/B Testing, Cohort Analysis, Funnel Analysis, KPI Monitoring, Hypothesis Testing, Time-Series Analysis, Data Quality Auditing

**Visualization & BI:** Power BI, Tableau, Excel, Google Sheets, Dashboard Development, Stakeholder Reporting

**Data Engineering:** ETL Pipelines, Data Modeling, Data Warehousing

**Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Plotly, Flask

## EDUCATION

**Vellore Institute of Technology (VIT)**

*Bachelor of Technology in Computer Science*

Vellore, India

*Jul 2021 – Jul 2025*
