SUMMARY

Technical generalist with hands-on experience in data analytics, AI agent pipelines, and full-stack web delivery. Built competitor intelligence systems and operational workflows at a consumer electronics startup; shipped a production React website end-to-end using an AI-assisted development pipeline. Comfortable owning both the analytical layer (SQL, Python, BI) and the execution layer (automation, deployment, ops). Seeking roles at the intersection of data, AI, and operations.

EXPERIENCE

CEO Intern – Strategy, Data & Operations

Apr 2026 – Present

Tunez (Consumer Electronics Startup, ~29 employees)

Bengaluru, India

- Built a 70+ brand competitor intelligence system (29 data points per brand) tracking pricing, listings, and review velocity across Amazon, Flipkart, and D2C channels; conducted sentiment analysis across 1,000+ reviews surfacing actionable product and pricing strategy for leadership.
- Designed and presented an 11-slide Partner Journey Analytics proposal to CEO: Power BI dashboard scoping 5,000+ retail partners across field sales KPIs, behavioral segmentation, and partner lifecycle metrics.
- Architected a three-module AI/CRM system proposal: multilingual AI voice agents, call analytics layer, and retailer CRM for 5,000 partners; identified critical build-sequence flaws and presented inversion rationale directly to CEO.
- Initiated HR attendance automation pipeline (Python + openpyxl + Gmail API) to auto-process eTime XLS exports, classify leaves, and sync payroll – reducing manual ops overhead across a 29-person team.

Freelance Developer – AI-Assisted Web Delivery

Jan 2026 – Present

KRIJA Luxury Real Estate (commissioned by Tunez founder)

Bengaluru, India

- Built and shipped a full production website ([krija.in](#)) using a Claude-assisted agentic development pipeline: React + Vite, Vercel deployment, custom SVG maps, PDF brochure viewer, and WhatsApp CRM integration.
- Delivered end-to-end: Google Sheets CRM via Apps Script, Google Search Console, security headers, SPA routing, and a blog system – zero prior client infrastructure to live in a single sprint.

AI Agent Evaluator – DocsLab (Worldsim)

Sep 2025 – Nov 2025

Alignerr (Invisible Technologies)

Remote

- Designed multi-app AI agent evaluation tasks on a simulated company environment (GitLab, Plane, Trudesk, BookStack, Twenty CRM); engineered prompts using a 3-axis difficulty framework (information branching, action channel branching, sequencing) to consistently hit a 10–40% agent pass rate.
- Validated tasks via pass@5 and pass@10 runs using Anthropic Claude (Opus); delivered structured benchmarks across 100+ ML algorithms improving evaluation consistency by 25%.

PROJECTS

SaaS Customer Churn & Revenue Risk Analytics | Python, SQL, PostgreSQL, Cohort Analysis

[GitHub](#)

- Identified \$697K churned MRR and 57% revenue churn across 2,800+ subscriptions via cohort lifecycle analysis; surfaced 40% higher churn probability in users inactive 30+ days.
- Pinpointed payment failures and support ticket spikes as primary churn drivers through behavioral segmentation; Premium users drove 68% of revenue loss.

Data Analyst Job Market Analysis – India | Python, Web Scraping, Pandas, Tableau

[GitHub](#)

- Scraped and analyzed 1,000+ job postings; SQL proficiency linked to 22% higher median salaries (Rs.6.8L vs Rs.5.6L), with Python + Tableau appearing in 45% of high-paying roles.
- Built a skill-to-salary demand framework via text parsing and skill normalization, mapping optimal upskilling paths for data analyst career progression.

TECHNICAL SKILLS

AI & Automation: Agentic AI Pipelines, LLM API Integration (Anthropic Claude), AI Agent Evaluation, Prompt Engineering, Workflow Automation

Data & Analytics: Python, SQL (PostgreSQL, MySQL), Pandas, NumPy, EDA, Cohort Analysis, A/B Testing, KPI Monitoring

Visualization & BI: Power BI, Tableau, Excel, Google Sheets, Dashboard Development

Web & Deployment: React, Vite, Vercel, Flask, REST APIs, Google Apps Script, Git

Operations: Competitor Intelligence, HR Process Automation, CRM Architecture, Market Research

EDUCATION

Vellore Institute of Technology (VIT)

Jul 2021 – Jul 2025

Bachelor of Technology, Computer Science

Vellore, India
